

Reporting AFC League Scores by SMS

As you'll be aware, from this season clubs should be reporting league results (not cup results) via SMS text messages, using the FA's Full-Time system. Inevitably there will be teething troubles, so we're listing here a selection of "errors" which clubs have submitted. This isn't to "name and shame", simply so that club officers and team captains can see the mistakes and hopefully correct them. We aren't issuing fines for mistakes at this stage - we're aware it's a new system and needs time to bed in. If you have any questions, please contact Mike Sainsbury.

Saturday 20th September

General: with a few exceptions, the SMS system worked well, though please note that the SMS reporting is for **LEAGUE GAMES ONLY**. Cup games should be reported by telephone or email according to the details given in the handbook and on the AFC website.

In addition, a number of clubs failed to report their results by SMS - either by simply not doing it, or by not beginning the SMS with the word **RESULT** (in which case it won't register).

Listed below are a number of the weekend's "errors" - if all those can note the correct formats for future use it would be much appreciated.

** Registered to text results for 1 side only - therefore does not need side code*
